Assignment 02
HICT 22013- Web Design and Development

Create a Portfolio Website

1. Website Requirements

Your portfolio website should have the following pages:

- Home Page: An introduction about yourself.
- About Page: Details about your background, skills, and interests.
- Projects Page: A showcase of at least 3 projects with descriptions, links, and images.
- Contact Page: A form for visitors to reach out to you (name, email, message fields).

2. Design Requirements

The website should have a consistent theme and design.

Use appropriate typography, colors, and images to make the website visually appealing.

3. Content Requirements

Write all content yourself.

Include a professional photo or avatar (if comfortable) on the Home or About page.

Make sure all text is grammatically correct and clear.

4. Bonus Features (Optional)

Add a blog section where you can post articles or updates.

Include a downloadable resume link on the About page.

Integrate a map on the Contact page to indicate your location.

Evaluation Criteria

Your submission will be evaluated based on the following:

- ✓ Design (25%)
- ✓ Functionality (25%)
- ✓ Content (20%)
- ✓ Code Quality (10%)
- ✓ Creativity (20%)

Submit a ZIP file containing your project folder to LMS.

Include a README file that explains how to open and navigate your website.

Submit on or before 31th January 2025.
You need to present your portfolio site. Presentation date: 5th February 2025
